SOFTWARE ENGINEERING PROJECTS
Software Engineering Immersive | General Assembly | Remote   May 2022 - Dec 2022
Successfully completed 500+ hours of expert-led instruction in Fullstack Engineering fundamentals and the industry's most in-demand technologies, including but not limited to the MERN stack, Python, Django, HTML, CSS, Postman, and PostgreSQL. Developed projects include:
- **Hoppy Havoc**: Single player game mimicking Flappy Bird using HTML 5, CSS, and Javascript.
- **GitFit**: Fitness App utilizing HTML, CSS, Javascript, PostgreSQL, NodeJS, Express Authentication, and Heroku to form an app geared towards people concerned with their health.
- **Generous**: Philanthropy App which utilizes HTML, CSS, Javascript, React, MongoDB, NodeJS, Express, Express Authentication, and Heroku in order to build out an app geared towards anyone with an altruistic side. Connected to various nonprofit-organizations via an API. Allows users to see & donate to nonprofits associated with a given search.
- **Spiel**: Full-Stack social media app designed using the MERN stack.

PROFESSIONAL EXPERIENCE
